1 Policy Definitions

- Confidential Data: Defined by the Commonwealth Office of Technology (COT)
 Standards Data of which the Commonwealth has a legal obligation not to disclose.
 This data requires the highest levels of restrictions, because of the risk or impact that will result from disclosure, modifications, breach, or destruction of that data. Examples include: Data not releasable under the Kentucky State Law; Protected Health Information; Federal Tax Information; Social Security and Credit Card numbers.
- Contract Staff/Personnel: Defined by CHFS as an employee hired through a state approved (i.e. System Design/Development Services {SDS} Vendor Agreement/Company) vendor who has a master agreement with the state.
- Critical Systems (Mission Critical): Defined by CHFS as any production
 applications developed, maintained or utilized by OATS that have a recovery time
 objective (RTO) of 7 days or less, a recovery point objective (RPO) based on the
 backup requirements that are typically nightly or otherwise specified, and/or federally
 mandated/regulated as critical. These applications are included in the Service Level
 Agreement (SLA) with COT as "Agency Critical Applications". These applications
 require creation and maintenance of Business Continuity Plan (BCP), BIA and
 Disaster Recovery Plan (DRP) documents.
- Electronic Protected Health Information (ePHI): Defined by the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule as individually identifiable health information, including demographic data, that relates to: the individual's past, present or future physical or mental health or condition, the provision of health care to the individual, or the past, present, or future payment for the provision of health care to the individual, and that identifies the individual or for which there is a reasonable basis to believe can be used to identify the individual. The13 individually identifiable health information items include many common identifiers (e.g., name, address, birth date, Social Security Number). The Privacy Rule excludes from protected health information employment records that a covered entity maintains in its capacity as an employer and education and certain other records subject to, or defined in, the Family Educational Rights and Privacy Act, 20 U.S.C. §1232g.
- Federal Tax Information (FTI): Defined by Internal Revenue Service (IRS) Publication 1075 as federal tax returns and return information (and information derived from it) that is in the agency's possession or control which is covered by the confidentiality protections of the IRC and subject to the IRC 6103(p) (4) safeguarding requirements including IRS oversight. FTI is categorized as Sensitive but Unclassified information and may contain personally identifiable information (PII). FTI includes return or return information received directly from the IRS or obtained through an authorized secondary source, such as Social Security Administration (SSA), Federal Office of Child Support Enforcement (OCSE), Bureau of the Fiscal Service (BFS), or Centers for Medicare and Medicaid Services (CMS), or another entity acting on behalf of the IRS pursuant to an IRC 6103(p) (2) (B) Agreement. FTI includes any information created by the recipient that is derived from federal return or return information received from the IRS or obtained through a secondary source.

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

- Major System Change: Defined by CHFS as the installation of a new or upgraded operating system, middleware component, or application, modifications to system ports, protocols, or services, installation of a new or upgraded hardware platform, modifications to cryptographic modules or services, and/or modifications to security controls. Examples of significant changes to the environment of operation may include for example: moving to a new facility, adding new core missions or business functions, acquiring specific and credible threat information that the organization is being targeted by a threat source, and/or establishing new/modified laws, directives, policies, or regulations.
- Personally Identifiable Information (PII): Defined by KRS Chapter 61 House Bill 5 (HB5) and in accordance with NIST 800-53 Revision 4 as information which can be used to distinguish or trace the identity of an individual; person's first name or first initial and last name, personal mark, or unique biometric or genetic print or image, in combination with one or more of the following data elements: account number, credit card number or debit card number that in combination with any required security code, access code or password would permit access to an account; social security number, taxpayer ID number, driver's license number, state ID number, passport number or other ID number issued by the United States government, or individually identifiable health information, except for education records covered by The Family Educational Rights and Privacy Act of 1974 (FERPA).
- Risk: Defined by NIST SP 800-30 as a measure of the extent to which an entity is
 threatened by a potential circumstance or event, and typically a function of: (i) the
 adverse impacts that would arise if the circumstance or event occurs; and (ii) the
 likelihood of occurrence. Information System security related risk is one that arises
 through the loss of confidentiality, integrity, or availability of information or
 information systems considering impacts to organizational operations and assets,
 individuals, other organizations, and the Nation.
- Risk Assessment: Defined by NIST SP 800-30 as the process of identifying, estimating, and prioritizing risks to organizational operations (including mission, functions, image, and reputation), organizational assets, individuals, other organizations, and the Nation, resulting from the operation of an information system. Part of risk management, incorporates threat and vulnerability analyses, and considers mitigations provided by security controls planned or in place. Synonymous with risk analysis.
- Sensitive Data: Defined by COT standards as data that is not legally protected, but should not be considered public information and only be disclosed under limited circumstances. Only authorized users should be granted access to sensitive data. Examples include: All information identifiable to an individual including staff, employees, and contractors but not limited to dates of birth, driver's license numbers, employee ID numbers, license plate numbers, and compensation information. The Commonwealth proprietary information including but not limited to intellectual property, financial data and more.

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

- Sensitive Financial Data (including PCI): Defined by Payment Card Industry (PCI)
 Data Security Standards (DSS) Security Standards as cardholder and sensitive
 authentication data including Primary Account Number (PAN), cardholder name,
 expiration date, service code, full track data (magnetic stripe data or equivalent on a
 chip0, CAV2/CVC2/CVV2/CID, and PIN(s). CHFS also defines sensitive financial
 data anything that is inclusive of bank identification/information (i.e. bank routing
 number, account number, etc.).
- State Staff/Personnel: Defined by CHFS as an employee hired directly through the state within the CHFS.
- Threat: Defined by NIST SP 800-30 as any circumstance or event with the potential to adversely impact organizational operations (including mission, functions, image, or reputation), organizational assets, individuals, other organizations, or the Nation through an information system via unauthorized access, destruction, disclosure, or modification of information, and/or denial of service.
- Third Party: Defined by CHFS as any contracted or government organization that is not a part of the agency's organizational structure. This may include state or federal auditing agencies, state approved security contract vendors or other external organization whose capabilities can be determined sufficient to conduct assessment needs.
- Vendor Staff/Personnel: Defined by CHFS as an employee contracted through an approved Master Business Associate Agreement, or other formal agreement, to provide temporary work for CHFS.
- **Vulnerability:** Defined by NIST SP 800-30 as a weakness in an information system, system security procedures, internal controls, or implementation that could be exploited by a threat source.

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

2 Policy Overview

2.1 Purpose

The Cabinet for Health and Family Services (CHFS) Office of Administrative and Technology Services (OATS) must establish a comprehensive level of security controls through a risk assessment policy. This document establishes the agency's Internal Risk Assessment (RA) Policy which helps manage risk and provides guidelines for security best practices regarding risk assessments, preparation, and strategy.

2.2 Scope

The scope of this policy applies to all internal CHFS state, contract, and vendor staff/personnel, temporary personnel, third party providers under contract with a CHFS agency, and other entities that interact with CHFS information related resources. This policy covers the applicable computer hardware, software, application, configuration, business data, and data communication systems.

2.3 Management Commitment

OATS Division Directors, the CHFS Chief Technical Officer (CTO), Chief Information Security Officer (CISO), and IT Executive Management have reviewed and approved this policy. Senior Management supports the objective put into place by this policy. Violations of not abiding by this policy may result in disciplinary action, which may include suspension, restriction of access, or more severe penalties up to and including termination of employment. CHFS shall report illegal activities or theft of CHFS property (physical or intellectual) to the appropriate authorities.

2.4 Coordination among Organizational Entities

OATS coordinates with CHFS organizations and/or agencies that access applications, systems, and facilities. All organizational entities that interact with CHFS are subject to follow requirements outlined within this policy.

2.5 Compliance

As the official guidance domain for this policy, CHFS agencies abide by the security and privacy requirements established in applicable state laws and regulations as well as federal guidelines outlined in the National Institute of Standards and Technology (NIST). Additionally, applicable agencies follow security and privacy frameworks outlined within the Centers for Medicare and Medicaid Services (CMS), the Internal Revenue Services (IRS), and the Social Security Administration (SSA).

3 Roles and Responsibilities

3.1 Chief Information Security Officer (CISO)

Individual responsible for providing guidance and direction in assessment, planning, and implementation of all security standards, practices, and commitments required. This individual is responsible for adherence to this policy.

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

3.2 Chief Privacy Officer (CPO)

An individual responsible for overseeing activities related to the development, implementation, maintenance of, and adherence to the Cabinet's and Commonwealth's information privacy and confidentiality policies and procedures in compliance with federal and state laws. This individual will conduct Health Insurance Portability and Accountability Act (HIPAA) risk analysis through coordination with the Information Security Agency Representative, the CISO, or CHFS OATS Information Security (IS) Team, and other CHFS agencies, and will ensure compliance with HIPAA notification and reporting requirements in the event of an identified breach.

3.3 CHFS OATS Information Security (IS) Team

The CHFS OATS IS Team is responsible for the assessment, planning, and implementation of all security standards, practices, and commitments required.

3.4 Security/Privacy Lead

Individuals are designated by the division leadership to coordinate privacy and/or security issues and incidents with all appropriate personnel. This individual(s) is responsible for providing privacy and security guidance for protection of PII, ePHI, FTI and other financial sensitive information to all CHFS staff and contractor personnel. This role along with the CHFS OATS IS team is responsible for the adherence of this policy.

3.5 CHFS Contract, State, and Vendor Staff/Personnel

All CHFS contract, state, and vendor staff/personnel must adhere to this policy. All staff/personnel must comply with referenced documents, found in Section <u>8 Policy References</u> below that pertain to the agency's applications, application servers, appliances, operating systems, web servers, network components, and database (server or components) that reside on CHFS/OATS information system(s).

3.6 System Data Owner and System Data Administrators

Management/lead, or appointed delegate, who works with the application's development team, to document components that are not included in the base server build, and ensures that functionality and backups are conducted in accordance with business needs. This individual(s) is also responsible for working with personnel within the enterprise, agency, application, technical and business areas, for providing full recovery of all application functionality, as well as meeting federal and state regulations for disaster recovery situations. The System Data Owner, or appointed delegate, is responsible for preparing the annual risk assessment as mandated by the <a href="https://example.com/hitps://example.c

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

3.7 CHFS OATS Security Risk Manager

This position is responsible for the governance of the overall risk assessment program within the Cabinet. This role will provide guidance to program areas in the assessment and identification of potential risks. They will inform, coordinate and assist the System Data Owner with documenting the risks and successful completion of the assessment. The Risk Manager will maintain communication with the System Data Owner and ensure that the schedule of upcoming security control assessments is conveyed so that timely submissions of the assessments are met and completed. The Risk Manager works with the System Data Owner to ensure that all risks be addressed based on National Institute of Standards and Technology (NIST) Special Publication 800-53 Revision 4, Security and Privacy Controls for Federal Information Systems and Organizations for moderate baseline requirements.

4 Policy Requirements

4.1 Risk Assessments

The agency will complete a risk assessment on all applicable privacy and security controls prior to new application inception, at the time of any major system change and at least once annually. Risk assessments provide a mechanism for reaching a consensus as to which risks are the greatest and what steps are appropriate for mitigating them. This approach makes it more likely that the System Data Owners will understand the need for agreed-upon controls, the controls are aligned with their systems and support the effective implementation. These assessments will be conducted in accordance with the National Institute of Standards and Technology (NIST) Special Publication 800-30 Revision 1, Guide for Conducting Risk Assessments and the HIPAA Security Rule, 45CFR164.308(a)(1)(ii)(A).

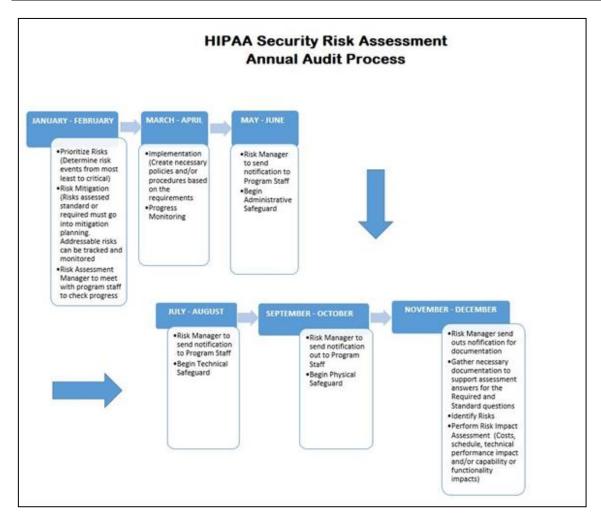

Additional guidelines for Risk Assessments can be found within the <u>Enterprise CIO-093</u> Risk Assessment Policy, <u>Enterprise CIO-082 Critical Systems Vulnerability</u> <u>Assessments Policy</u>, and the <u>CHFS Risk Assessment Program Procedure</u>.

4.2 Risk Assessment/Annual Audit Process

An annual risk assessment is to be conducted by the System Data Owners for each system that contains ePHI. After the assessment is conducted, it is the sole responsibility of the System Data Owners to mitigate risks found. A mitigation plan strategy must be presented to the CHFS OATS Security Risk Manager outlining what steps are being taken to eliminate the risk. All activity will be tracked using the Archer governance tool or other comparable method. If using Archer, notifications are sent to the System Data Owners to start the process of mitigating the identified risk.

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

4.3 Cyber Security Framework (CSF) Components: CSF vs RMF

Organizations can use the Cybersecurity Framework (CSF) to complement the existing NIST RMF. The CSF was developed under <u>Presidential Executive Order 13636</u>. The RMF is part of a suite of risk management standards and practices developed in response to the FISMA, as amended 2014. The CSF Framework complements, and does not replace, the CHFS risk management process and cybersecurity program. CHFS can use its current risk assessment processes and leverage the CSF to identify opportunities to strengthen and communicate its management of cybersecurity risk. Assessments using the RMF can use aspects of the CSF to strengthen the RMF activities, which are not be impacted by the CSF.

Each agency will be subject to ongoing internal security control assessments. The NIST control families and are initiated by utilizing pre-defined procedures and the NIST CSF.

040.201 Internal Risk Assessment Policy	Current Version: 1.2
040.000 Contingency Planning/Operations	Review Date: 4/5/2019

These assessments shall:

- Identify Risk;
- Leverage existing assessments;
- Obtain evidence (evidentiary artifacts) that items identified in policy/procedure directives are being carried out;
- Enable artifact validation;
- Help determine residual risk;
- Enable gap analyses;

Initiate risk treatment as necessary.

5 Policy Maintenance Responsibility

The OATS IS Team is responsible for the maintenance of this policy.

6 Policy Exceptions

Any exceptions to this policy must follow the guidance established in <u>CHFS OATS Policy</u>: 070.203- <u>Security Exceptions and Exemptions to CHFS OATS Policies and Security Control Policy</u>.

7 Policy Review Cycle

This policy is reviewed at least annually and revised on an as needed basis.
